Emergency Response for Sailors

Revision 1, 16 Sep 2019

Aim

This document is a short form of the Emergency Management Plan, which aims to remind sailing skippers and crew what they should do if their boat capsizes.

If you can, stay with your boat

Your boat is what the Support boat will see, it is bigger than you.

If your boat drifts away from you:

swim to the nearest shore, then

walk towards the point where your boat is drifting ashore

The search pattern of the Support boat will assume that this is what you will do, if able.
